Preface

There are a lot of lies in media. The Western media are in the post-truth. Knowing the truth from Lyndon Larouche PAC and its international network, I decided to tell the truth about recent history.

French Politics

Elections in 3 french political parties

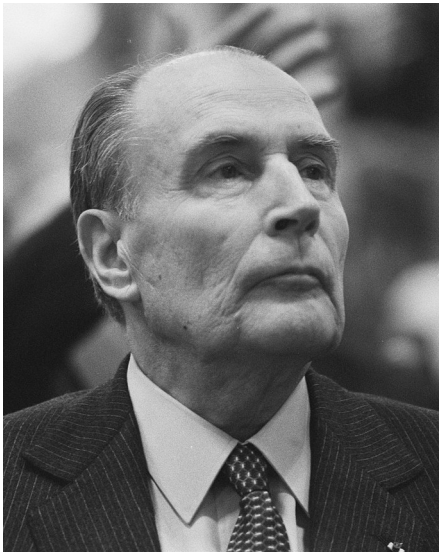
Monday, May 19, 2025

Let's start with party that finished 4th in the 2017 presidential elections, according to ex-journalists from Sud Ouest on Agoravox TV. It's Solidarity and Progress. The Solidarity and Progress office is elected each year in September during the association’s general assembly.

Let's continue with the political parties that are in minority in 2025 but were popular until the presidency of François Hollande. The Socialist Party has along used paper ballots for its elections. These were the most regular elections of all political parties. Televised debates had been organized for Ségolène Royal’s election, who had really received militants’ approval in 2006. But Ségolène Royal should have been elected national secretary of socialist party in 2007. Indeed, every socialist party’s leaders asked to cheat in their stronghold to elect Martine Aubry, who was an outsider but appreciated by media after Delanoé, a liberal. Martine Aubry was conservative until she chose the compressed air engine for Lille city hall. So she sustained Ségolène Royal after. We have spotted in all Socialist party’s conservative strongholds ballot boxes overfilled with fake ballots in 2007. Then socialist party’s activists thought that François Hollande was like Ségolène Royal. Indeed, Ségolène Royal had started his campaign well with France’s sovereignism. But right after, she is not appreciated on television. So she campaigned on media denigration, that activists do not like. Then she will always be denigrated by PS office, which activists will feel irregular only for a little part of them.

Nicolas Sarkozy inaugurated the elections into UMP’ party and then to the Republicans. But UMP’s elections were done with laptops. So it was always the Republicans' office that decided the elections. So initially it was Sarkozy and then it was financial that decided always against activists’ vote.

François Mitterrand



Objectives

François Mitterrand was a French Republic's President from 1981 to 1995. He promised to restore justice. Above all, he wanted to win the elections and bring socialist party to power uniting the left. François Mitterrand has presented to elections for a long time without winning national fervor. Having done a lot of studies we should think that he should follow the system. This was partly the case. He really wanted to be the first.

Mendès France

The Mendès France government will undoubtedly inspire François Mitterrand for the first year from 1981 to 1982. The Nationalization Law of February 11, 1982 will preview an exacerbated market law. French money will be privatized from 1973 to 1983. Without a public currency, it is debt money's mechanism that is chosen.

Jacques Chirac

Jacques Chirac was Republic’s President after François Mitterrand from 1995 to 2007. He cheated to become president. His campaign had exceeded 20 million in funding.

He did not support great projects. Pro-nuclear, he did not take decisions on nuclear power not closing any power plants.

Jacques Chirac exceeded the 1995 campaign financing threshold with Balladur. While this was known, Constitutional Council did not arrest them.

On the opposite, he repressed Jacques Cheminade whom speaking time was not respected. The council invalidated Cheminade's accounts for zero-interest loans that were nevertheless allowed. Thus the fifth Republic was defeated.

Jacques Chirac marked the continuity of France’s deindustrialization restricting budgets with Mitterrand's private currency.

Lionel Jospin

Jacques Chirac dissolved National Council in 1997. Lionel Jospin was then elected France's Prime Minister cohabiting with Jacques Chirac.

Lionel Jospin reduced debt with an active politics, the 35 hours, stopping ambitious projects.

He decided to stop Superphénix for technical reasons. However, this experimental generator aimed to use French nuclear waste was usually related to technical problems.

Stopping Superphénix is not only due to Lionel Jospin. Indeed, French were predominantly anti-industries and anti-nuclear until 2022. France was therefore returning to the Middle Ages.

Nicolas Sarkozy

Having participated to Balladur campaign, Nicolas Sarkozy cheated once again to become president from 2007 to 2012, financed by Libyan dictator. Ségolène Royal, who wanted to restore justice, bore the costs.

While General De Gaulle had left NATO so that France could pursue its own poltics, Nicolas Sarkozy returned to NATO command on November 7, 2007. So, after, France went to war with NATO.

Nicolas Sarkozy decided to destroy Libya as the United States wanted leading NATO. Indeed, Muammar Gaddafi, the Libyan dictator, wanted to establish the first African public currency. He was leader of his country's growth.

Thus Libya was destroyed and African migrants could now come to Europe, as indicated by Elysee Palace's advisers. Slavery was also established in Libya.

The Astrid project targeted to use French nuclear waste was set up in 2010. It was abandoned by left party in 2019. Nicolas Sarkozy also launched Flamanville EPR's building.

François Hollande

François Hollande waited until 2011 to participate to socialist candidacy. Indeed, he already wanted to be a candidate in 2007 against his ex, Ségolène Royal, in 2007.

Media's favorite behind Martine Aubry a conservative, he won against her and against his ex. Ségolène Royal, whom was yet cheating's victim. She should have been first secretary instead of Martine Aubry. But Ségolène Royal made a bad campaign in 2011 castigating the media going against her. So she won only 7% of the votes.

François Hollande had the merit to not cheat to become Republic's President from 2012 to 2017. But being afraid of dying, he did not institute a Glass Steagall with the Muscovici reform, permitting to banks them to robe deposits. François Hollande further unraveled fifth Republic a little more aligning legislative elections with presidential elections. Indeed, cohabitation allowed presidency either to be tested or to be stripped of its power.

François Hollande did not make the mistake to stop Astrid. But his ministers will stop it when he will become president, namely Emmanuel Macron. The EPR was a fiasco because of France's deindustrialization.

Emmanuel Macron

According to journalists from South West media broadcast on Agora Vox TV, whom collected 2017 elections' votes and followed the 2022 elections, Macron was not elected by French. We observed irregularities such as no null ballots, which was then reviewed without cancellation. There was also ranking by 100 of ballots to go to a room and then come back. In fact, Macron came last in the 2017 presidential elections. Marine Le Pen lost two million votes for a little gain to Macron in 2022 on television.

https://archive.org/details/e-macron

This is explained with social networks' centralization. Indeed, IT makes it easy to know what each citizen is doing. And if we don't know what he's doing, it's shady.

Thus, finance used social networks' news to hide cheating with the censorship of social networks and DRM, which were effective. The DRM are automated copy-rights that make it easy to delete any content by copyright. These DRM also make it possible to hide pedocriminality protecting pedocriminal networks by HADOPI and LOPPSI.

The delay to view really results is due to French whom follow, whom prefer to forget about work and become consumers instead of citizens. The French don't dare to talk politics so does not look around it.

Since the S and L high school classes, the French no longer reflects and only thought with screens in 2017. There should have been a duel between Melenchon and Le Pen in 2017 in the second round with the third candidate

Jean Lassalle obtained more than 20% of votes, Cheminade the 4th and the other "small" candidates obtaining more than 5% of votes.

We see on television in 2022 that Macron is behind Le Pen after second round so then Le Pen loses 2 million votes without any challenge.

Emmanuel Macron stopped Astrid. He thus defies national budgets to abolish taxes on very riches. Thus the inequalities widened as never before.

In 2021, the French were supporting nuclear power. Thus, Emmanuel Macron partially revived French nuclear program. At the same time, he allowed finance to rent with wind power and photovoltaics usually promoted by Germany, power plants that consume more useful energy than they bring in.

Having placed French nuclear power to financial markets, energy's price grown when we began war in Ukraine, but inflation had already begun before this war.

Emmanuel Macron had high-profile politicians in front of him, namely Jean-Luc Mélenchon the vilifier and Marine Le Pen the anti-immigrant. All the known political parties nominated the right candidates. Thus Ségolène Royal was repressed by Socialist party comity.

Jean Lassalle could go against Macron. But himself and Georges Kuzmanovic were not publicized, both wanting France growth. Georges Kuzmanovic could not even be a candidate. Jean Lassalle obtained his fans votes' and those who read his program, namely 20%.

Science

Coronavirus

Coronavirus was a mild disease. Christian Perronne was sacked to nefuse to create a vaccine, vaccines that caused more deaths than coronavirus itself. Usually, we make a vaccine in 7 or 10 years.

Covid-19 includes flu. So deaths from coronavirus were deaths from flu. Coronavirus lasted only 3 months in the West. The following coronavirus' variants were more benign than benign as in any virus spread.

People's confinement comes from Middle Ages. Confinement accentuates viruses' spread, as we saw with the avian poultry's spread.

Ivermectin and hydroxychloroquine have been banned. However, these drugs have saved patients, as Professor Didier Raoult showed.

The vaccines

Every vaccines contained diseases that spread in people. Christian Perronne reports dazzling and very active cancers after vaccines' injection. The non-neutral excipient so contained a lot of DNA diseases.

Gene therapy is the therapy that uses RNA messenger. This therapy has never worked. Indeed, it pollutes body. Thus RNA messenger vaccines pollute the body to weaken it. Worse, they can cause death or amputations activating immune system against body's cells. Indeed, immune system may believe that cells polluted by RNA messenger producing Spyke virus are harmful and can thus cause undesirable effects.

OMS predicts a new epidemic in 2023 and is calling to vote in West on liberti-

cide laws.

IPCC

IPCC, The Intergovernmental Panel on Climate Change, is a political and scientific organization of 300 scientists bringing together neophytes politicians and ambassadors to validate scholars' reports. From 1989 the IPCC announces a climatic cataclysm every year which should have happened ten years later from 1999.

The climatic cataclysm is finally widely and increasingly publicized starting from finance's collapse, causing stress to followers that believe that. Indeed, many young people say they are anxious about future and the fertility rate is collapsing.

Part of scientific community will not approve the IPCC's reports. At first incredulous, the scientific community that studies both sun and earth, then only earth, will organize against IPCC. Thus, 30,000 scientists were classified as climate skeptics, many refusing this designation.

In France, François Gervais will be classified as climate skeptic, that is to say, not believing in human earth's warming, while he does not question human warming but minimizes it. The IPCC will publish its reports without believing them, in particular a report saying that CO2 should produce an increase of 0.2 °C under 30 years, a report by IPCC questioning the IPCC's work.

At the end, the IPCC will have caused a suicides's kills for a false earth's warming. Media caricature will be in 2025, when the media will assume a false warming while the climate is clearly cooling over France.

NATO wars

NATO is becoming poorer because finance owns currency, this organization organizes itself to favor only finance, therefore wars. Indeed, the real economy represents 3% of the world's money in 2020. Finance owns the rest and creates money with money. Thus, it spends tens of billions to target the West and act in competing countries. Then a war economy is created. To keep an activity we produce weapons since the industries are in China, a little in Germany, Italy and the United States.

As NATO loses ground, this organization goes to war becoming poorer and poorer. NATO is being questioned by Russia for causing the Russian invasion during the Ukrainian war that really began in 2015.

Daesh

Osama Bin Laden had been financed by United States against Russia before he was attacked by United States.

To keep control to resources, the West will then finance Daesh in Africa making it appear that it is fighting against. Indeed, Nathalie Yamb will indicate that the French helicopters were sending messages to Daesh in Africa on the positions of the African armies.

Thus, the fight against Bashar Al-Assad in Syria will end with Daesh in power in Syria, which will then create massacres against Muslims and Christians.

Yugoslav Wars

Serbs were pro-Russian and numerous. They were thus mostly Yugoslavian majority. This bothered the United States, which went to war with Yugoslavia in 1999.

The Serbs wanted to keep Yugoslavian unity going to war against the secessionists. This mistake was fatal for the Serbs since the United States asked them to let the UN take care of Kosovo when it had been annexed by Serbs, an impossible agreement to pass for Serbs. So European countries like Spain will not recognize Kosovo.

The Serbs kill was invented by the United States' diplomacy. Germany then launches the media manipulation, followed by France with Le Monde, then Le Figaro. England and Russia will follow the manipulation. After, an air war is launched against Serbs, causing 140,000 deaths because civilians were targeted.

Iraq war

Saddam Hussein wanted to use a currency replacing the dollar for inter-country transactions. That's the reason for the Iraq War.

Jacques Chirac will not go to war in Iraq in February 2003. On the other hand, Nicolas Sarkozy, his successor, will go to war. The war is still ongoing in 2023.

Syrian war

Bashar al-Assad

The European Union wanted a pipeline to go through Syria. Bashar al-Assad refused. Thus begins the Syrian war in 2011.

The United States will bring chaos campaigning for anti Bashar al-Assad factions. Impoverished, the West left Syria because of Donald Trump. He will let Russia and China put order in the chaos created. Israel will continue to bomb Syria, preventing reconstruction.

Joe Biden restarts war in Syria. We don’t know why in 2024 the Syrian regime collapsed. The Syrian soldiers abandon their posts and let Daesh take power, creating massacres after peace.

Libyan war

Mouammar Kadhafi

Libyan war happened between March 19, 2011 and October 31, 2011. It is due to the destabilization of Libyan social networks because Muammar Gaddafi wanted to create an african currency.

The war will have left a country destroyed by bombs. The enslavement of migrants who want to go to Europe then happened. Indeed, Libya prevented migrants from going to Europe.

Afghan war

Taliban convoy in 2021

NATO makes war in Afghanistan to destabilize China. The NGOs created there grab the money provided for Afghan people. However, the Taliban, an ethnic group united with Afghan people by same religion, will always have fought against drugs. NATO is installing poppy cultivation in the country.

The United States left Afghanistan to prepare for Ukrainian war, since the CIA destabilized a rapprochement from Ukraine to Russia in 2013. The Taliban then promised to suppress drugs in Afghanistan.

Ukrainian war

Tractor in a Ukrainian field

Ukraine is the wheat's grain of the West. Russia and China are competitors for the United States and especially finance, which wants to divide and conquer.

Viktor Yanukovych is destabilized by the CIA in 2013, CIA financing the Nazis and then armed protesters. On March 11, 2013, the Supreme Council of Crimea proclaimed the independence of the Autonomous Republic of Crimea and then voted to join Russia.

The Ukrainian civil war against Ukrainian Russians begins in 2014. Trump will refuse to go to war with Ukraine.

Supplying weapons to the Russians in Ukraine, Russia enters the war against Ukraine in February 2022, since Ukraine had attacked Russia. The Western media will make believing that it is Russia that is attacking, but also that the war should have started in 2022. Russia with the advantage of the air will have very few losses while Ukraine will lose a lot of soldiers on the front.

International Politics

Donald Trump

Donald Trump is the 45th president of the United States, from January 20, 2017 to January 20, 2021 and the 47th president of the United States on November 5, 2024.

He pursues a protectionist and liberal policy aimed at few impositions within the United States and customs taxes for imported products. This encouraged Apple and Intel to return to the United States, leaving factories in China anyway because China has the best engineers in the world.

The Ukrainian war should have started under his first mandate. Thus, the destabilization of Ukraine by the CIA, which began in 2008, will continue until the Democrats cheat on the elections in 2021, as Donald Trump will often repeat.

Indeed, Republican senators are finding machines that redirect votes to Joe Biden. Since we can't count the ballots to prove this since the voting machines don't print them, Biden is elected.

Supported by media, the Democrats will try to destabilize Donald Trump at the slightest misbehavior. On the other hand, Joe Biden's corruption will only be partially revealed in media. Kamala Harris will suck enough to allow Donald Trump to win in 2024.

Donald Trump will partially wage war but will protect badly his country from

China, which he believes to create the United States crisis. He will stupidly tax resources as much as products. So industries workers fall to 8 000 in United States. Donald Trump do not know Lyndon Larouche.

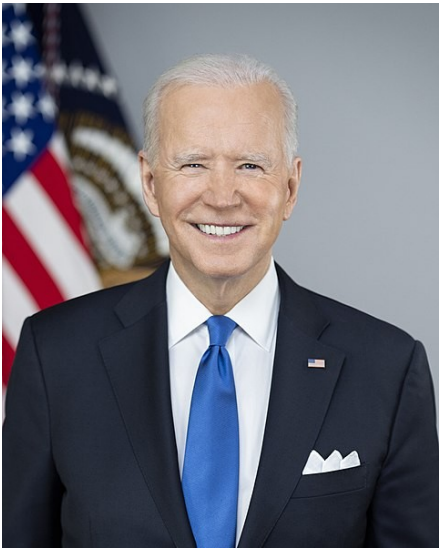
To finance his campaign, Donald Trump is going to have financiers as collaborators. His collaborators will manipulate him to lead war in Iran and Ukraine. According to Jacques Cheminade, the Director of intelligence of the United States indicated that Iran was not a threat. Donald Trump said as a child that she didn't know anything. So the Iran War shows the political chaos of the United States.

Chaos will continue. I think Charlie Kirk was advising Donald Trump. Indeed, the world press was going against him with Le Monde in particular, which will be taken up on his lies about Kirk after his death. Right after Kirk's death, Donald Trump will officially go to war in Ukraine.

https://www.agoravox.tv/actualites/international/article/la-revelation-choc-de-charlie-kirk-106943

Trump with his taxes policy encouraged the global south's countries to join the BRICS organization. He then lacks resources because of his taxes but also petroleum because he does not want to switch to fast-neutrons or thorium. So he attacked a country that has got petroleum and was led by the CIA before Hugo Chavez.Nicolas Maduro is kidnapped. But above all, it risks almost to create chaos in this country.

Joe Biden



Joe Biden was educated in a tax haven, Delaware. He will become its senator from 1973 to 2009.

He will be Vice President of the United States from 2009 to 2017. He becomes President of the United States in 2021.

His presidency is marked by the organized and hidden corruption that he leads for the personal enrichment of his family. Indeed, his son's computer will be seized by justice system for corruption. Trump's protectionism will hold.

Vladimir Putin

Vladimir Putin has been President of Russia and the Russian Federation since 1999. Vladimir Putin is wanted by Russians, unlike most of the Western elected officials.

The elections in Russia are legal enough for Russia to be considered a democracy. Twitter is allowed in Russia. Social networks that did not want to go to Russia did not want to install their server in Russia, although this is required by Russia.

Vladimir Putin decided from his first mandate beginning a growth politics, wanted by Lyndon Larouche. A russian decision-makers have known Lyndon Larouche for a long time.

Xi Jinping

China is certainly not a rights' country with social credit, but it is indeed a consultative democracy. Indeed, the Communist party is the government party, but local parties are authorized and meet every year to decide on national projects.

China and Russia have a public currency. Xi Jinping continued China's growth politics. From Xi Jinping mandate, many world's countries used the Yuan, which accentuated the world's de-dollarization due to Ukrainian war.

The French ambassador of China and Chinese decision-makers shown up at the Schiller Institute, the political association wanted by Lyndon and Helga Larouche. Despite being repressed by the media, Lyndon Larouche influenced the growth politics of China and Russia for a long time ago.

China has an internal quantum network. She set up an experimental quantum satellite that worked.

China will get moderate Hamas' branch to sign the two-state solution, according to CGTN. So the media are lying about no possibility to negotiate with Hamas. Thus, many countries will then recognize the Palestinian state.
